

# Creating a Custom Grey Card

1. Create a new document:  
File > New  
Name it Custom Grey Card  
Fill in Width, Height and Resolution

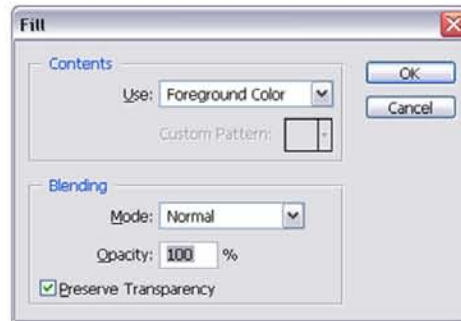

2. Go to the color Palette  
Click on the side arrow to bring up the Palette menu.  
Select Lab Sliders

3. Change the L slider to 50  
a slider to 0  
b slider to 0

4. Go to Edit > Fill  
Use Foreground color.  
Click OK.

5. If you are creating the grey card to use for portraiture, you may wish to add a slight blue tone to the card. This will give you warmer skin tones.

To do this:

- A. At the bottom of the layers palette, click on the “create new adjustment layer” icon, and select Photo Filter.
- B. Choose the Cooling Filter (82) and set the Density to 5%. Be sure to Preserve Luminosity.
- C. Click OK.

6. You are now ready to print your custom grey card.
